

Hybrid Roundup Ready Canola with Ultracoat™

- Canola growers that require the most yield as early as possible enjoy the hybrid 4362 RR. Once again this hybrid delivered on time and shows impressive results with its vigorous early development, making it a great candidate for direct harvesting.

Key traits of 4362 RR

- Yield index 116%
- 2 Days earlier than 46A65/Q2
- Moderate resistant to Blackleg
- Resistant to Fusarium Wilt
- Medium /early maturity
- Medium /tall
- Excellent standability
- Hybrid vigour

Seed enhancements

- Ultracoat™:
A phosphate based seed coating which improves the performance of BrettYoung's best seed products. The nutrient coating is beneficial as it ensures precisely place nutrients with the germinating seeds. This is crucial in receiving the greatest potential yield.
