

Open Pollinated Canola

- Coined with the phrase “the OP that performs like a hybrid”, the 997 RR is a leader when it comes to open pollinated Roundup Ready varieties. It combines vigorous plant development with yield, disease resistance and oil into a very good package for the grower that doesn’t devote all acres to hybrids.

Key traits of 997 RR

- Best OP RR canola registered to date
- Yield index 108%
- Resistant to Blackleg
- Medium maturity
- Medium /tall

Seed enhancements

- Ultracoat™:
A phosphate based seed coating which improves the performance of BrettYoung’s best seed products. The nutrient coating is beneficial as it ensures precisely place nutrients with the germinating seeds. This is crucial in receiving the greatest potential yield.
